

Online Workspace, Simplified

Service Providers are now empowered to offer an online 'Unified Workspace' that enables hybrid cloud with zero complexity.

Awingu.com

One Workspace. Any Device. Anywhere.

- A browser based 'Unified workspace' with access to legacy apps, SaaS & files
- Work from any device
- Fully secure environment with no local data residing on end-user devices

Barracuda®

- Secures cloud infrastructures with NextGen Firewall
- Allows you to move even the most mission-critical workloads
- Easy setup of hybrid cloud deployments

Awingu and Barracuda - Thanks to Barracuda's NextGen firewall 'zero touch' configuration, hybrid Awingu deployments are made easy

- Applications can be hosted on Microsoft Azure or on-premises, while securely connected to Awingu's browser-based workspace
- Barracuda's firewalls protect Microsoft Azure deployments at many top-tier companies
- Awingu provides an Microsoft Azure based workspace solution with access to legacy software, SaaS and documents
- Barracuda firewalls streamline network access, monitoring and management
- Awingu provides a platform agnostic and secure access to applications and files, without the need to manage the end-point

"The combination of Awingu and Barracuda's Next Gen Firewall is a unique opportunity for businesses to smoothly move into the Microsoft Azure cloud."

Chris Dial, Director Cloud ISVs, Microsoft

Smooth & easy transition to a Cloud-based workspace

Awingu.com

One Workspace. Any Device. Anywhere.

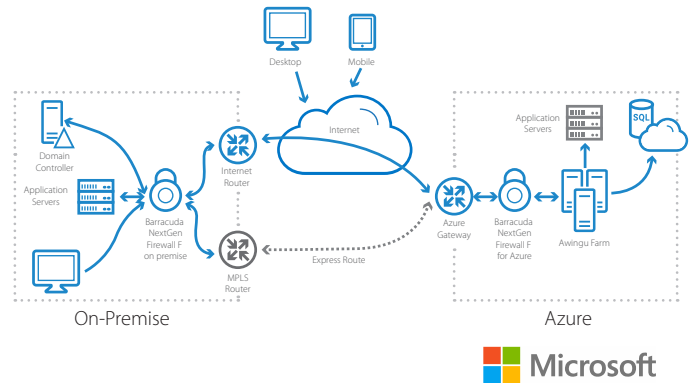

Awingu's unified workspace

- Browser-Based: runs fully in a browser. No software or agents to install or maintain. Awingu will make legacy applications (RDS based) available in html5
- Aggregator: end-users access legacy applications, SaaS and files behind one single login and workspace
- Best Return-On-Investment: fully browser based solution reduces cost to deploy and simplifies ongoing maintenance
- Service Provider Ready: Awingu is multi-tenant, has open API's (e.g for billing and provisioning integration) and can be fully branded

NGF Barracuda
NextGen Firewall F

Barracuda NextGen Firewall F-Series

- High-Performance Security: easily secures high-performance VPN and VNET connections
- Supports Multi-Tier Architectures : allows deployment of secure multi-tier network architectures in Microsoft Azure (diagram below)
